

Aspire Health telephonic palliative care program for Medicare members

Published: Oct 1, 2019

The Aspire Health Telehealth Palliative Care program provides an additional layer of telephonic support to members facing a serious illness. Aspire Health is an independent company providing telephonic palliative care on behalf of Anthem. The program is focused on:

- Helping patients understand their diagnosis
- Facilitating conversations with patients and their families around their goals of care
- Helping to ensure patients receive care aligned with their goals and values

The program begins with an initial 30 to 60 minute telephonic assessment by a specially trained Aspire Health social worker. The conversation in this initial call focuses on building rapport and completing a comprehensive assessment. This assessment includes understanding the patient's perception of their illness and current treatment plan. Follow-up calls occur every 2 to 4 weeks, typically lasting 15 to 45 minutes, with the exact frequency based on a patient's individual need.

Aspire Health's social workers are supported by a full interdisciplinary team of board-certified palliative care physicians, nurses, and chaplains who provide additional telephonic support to patients and their families as needed. Patients enrolled in the telehealth program have access to 24/7 on-call support. The average patient is enrolled in the program for 6 to 8 months with some of the key goals being the ability for patients to teach-back their current medical situation, articulate their health and quality-of-life goals, and establish a future care plan through either the completion of advanced care planning documents and/or a transition to hospice when appropriate.

More information is available at www.aspirehealthcare.com or by calling the 24/7 Patient & Referral Hotline at 844-232-0500.
