Anthem's new Digital Provider Enrollment application - now available

Published: Apr 5, 2019

Anthem Blue Cross and Blue Shield (Anthem) continues to make it easier and more convenient to become a participating provider. The Digital Provider Enrollment application has been designed to speed up the enrollment process, allow providers to submit data at one time, and obtain real-time updates on the status of an application.

Access to the new application is available through [Availity](#), Anthem's secure web-based provider portal. New and current [Availity](#) users should ensure their user ID has the correct access. Please ensure that you have been assigned to *Provider Enrollment*.

Digital provider enrollment offers many benefits:

- Supports enrollment of professional providers, whose organizations do not have a credentialing delegation agreement with Anthem.
- New individual providers or groups can request a contract.
- Existing groups can add providers to their existing contract.
- Providers can check the status of an application in real-time using the enrollment dashboard.

To use the new Digital Enrollment application, please ensure your provider data on CAQH is current and in a *complete* or *re-attested* status, then log into [Availity](#) and use the following navigation: Choose your state > Payer Spaces > Provider Enrollment.

“Working with Anthem” webinars

Don't forget we are also hosting our [“Working with Anthem” webinars](#) and this month's topic will be the new Digital Provider Enrollment application tool. We will have a guest presenter providing a live demo. Check out our registration link to register today!
