## Provider Manual to be updated with new format

---

Published: Oct 1, 2018

The [Provider Manual](#) will be updated with a new format prior to the end of 2018. The new format will be a single document with a table of contents that will make it quicker and easier to view the section(s) of interest to you. You'll be able to simply click a hyperlink in the table of contents to navigate directly to a specific section of the manual.
