

Sepsis diagnosis coding and billing reminder

Published: Jul 1, 2019

To help ensure compliance with the coding and billing of Sepsis, Anthem Blue Cross and Blue Shield reviews clinical information in the medical records submitted with the claim, including lab results, treatment and medical management. In order to conduct the review accurately and consistently, our review process for Sepsis applies ICD-10-CM coding and documentation guidelines, in addition to the updated and most recent Sepsis-3 clinical criteria published in the [Journal of the American Medical Association, February 2016](#). At discharge, clinicians and facilities should apply the Sepsis-3 criteria when determining if their patient's clinical course supports the coding and billing of Sepsis. The claim may be subject to an adjustment in reimbursement when Sepsis is not supported based on the Sepsis-3 definition and criteria.
